

Home Energy Savings Program

Save energy AND money while improving the comfort of your home

The **Home Energy Savings Program** is designed to save energy for consumers like you, *AND* cut your energy costs. The program assesses your energy use and even provides on-the-spot service for instant savings. It's a *FREE* service for all TTD customers.

In one easy appointment at your home, a certified technician will:

- ① Start with an overall health and safety check of your house.
 - Carbon monoxide test
 - Combustion appliance zone test
- ② Perform a blower door test.

By depressurizing your house, the technician will find air leaks and correct them with caulk, door sweeps and v-seal.
- ③ Perform a duct test.

This test will look for air leaks within your home's ductwork system.
- ④ Install CFL bulbs and four courtesy LEDs.

With this program, TTD customers are eligible for CFL and LED upgrades from old incandescent bulbs.
- ⑤ Install water and water heating energy-saving measures.
 - Low-flow shower heads
 - Faucet aerators
 - Pipe insulation (if applicable)
- ⑥ Provide special rebate offers for replacing inefficient appliances, including:
 - Air conditioners
 - Heating and cooling systems
 - Water heaters

OFFERS SUBJECT TO CHANGE
- ⑦ Provide a special rebate offer for installing additional attic insulation.

For natural gas or electric heating, and/or central air conditioning customers only.
